

## Seatpost sticker attachment

Your time will be recorded using Chronotrack RFID timing systems. For your event we are using B-tags, a very thin strip encoded with your entry number and event details.

The timing tag is already attached to your seatpost race number, ready for you to attach to your seatpost.

1. Gently peel away from backing paper.
2. Using both hands hold each end of the label then ...

3. place seatpost label in centre of seatpost ...

- 4 ... join the ends evenly ...

- 5 ... and press together to seal

Please do not fold or attempt to remove your timing tag. **If you fold or crease the tag you may break the circuit and no times will be recorded. Do not fit other than as instructed or no times will be recorded.** If you cannot attach the tag as described above please ask an official for assistance
